

STATISTICAL ANALYSIS OF RICOCHET

At the 2023 Australian Ricochet Singles championships, a statistical analysis was undertaken of all the shots undertaken during the two games in the final.

The analysis was of the shots undertaken and not whether they were successful or not.

Shot Selection	Number	Percentage
Short roquet less than 7 yards	97	17%
Long roquet greater than 7 yards	46	8%
Ball position	160	28%
Hoop position	92	16%
Rushes	92	16%
Hoop attempt	86	15%
TOTAL	573	100%

The analysis indicates while its important to score hoops its also important to obtain ball and hoop positions which leads to hoop attempts.
